Robert Focke

Software Developer at Norwegian Refugee Council
Berlin, Berlin, Germany

Summary

I am a young professional in the computer science and linguistics field, interested in machine learning, big data and computational linguistics.

Currently working in the humanitarian sector and keen to find other ways to contribute to the betterment of the lives of those less fortunate, the environment and wildlife!

Advocate of Free/Open-Source software, aligned with the four essential software freedoms outlined by the FSF.

I have good knowledge of general system administration, software development including full-stack web development and modern devops.
